Dear Valued Customer

Government officials have narrowed their search for the cause of an ongoing multistate outbreak of *E. coli* O157: H7 to romaine lettuce grown in Yuma, Arizona. Our deepest sympathies go out to those people who have been impacted by this outbreak.

Currently, we are harvesting and shipping California-grown romaine lettuce. We have no reason to believe that any of our product is affected by the E.coli outbreak. At this time there is no product under FDA recall and the investigations remain ongoing to find the source and cause of this outbreak.

More information on the E.coli outbreak can be found at:

[FDA](#) page on the outbreak
